

Professional Summary

Computer Science graduate with hands-on experience in Python, FastAPI, React.js, SQL, and REST API development. Built AI-based and full-stack web applications using machine learning, MongoDB, and cloud/devops tools. Seeking a software engineering opportunity to contribute to backend and AI-driven application development.

EDUCATION

Annamacharya Institute of Technology and Sciences
Bachelor of Computer Science | GPA: 6.7
Amaravati Junior College | Percentage: 65.7
Sri Chaitanya EM School | GPA: 9.3

Tirupati, India
(2021 – 2025)
(2019 – 2021)
(2019)

SKILLS SUMMARY

Programming Languages: Python, JavaScript, SQL, Shell Scripting
Frontend Technologies: React.js, HTML5, CSS3
Backend Technologies: Node.js, Express.js, Django, REST APIs, FastAPI, Authentication, CRUD Operations
Databases: MongoDB, MySQL
AI/ML Tools: Hugging Face, NumPy
Cloud & DevOps: Docker, Kubernetes, Terraform, Ansible, Jenkins, GitHub Actions, AWS (EC2, S3, IAM), CI/CD
Developer Tools: Git, GitHub, Visual Studio Code, Postman
Operating Systems: Linux (Ubuntu)

WORK EXPERIENCE

FREELANCING | Chegg | Remote

December 2024 – March 2025

- Analyzed large educational datasets to extract insights on student engagement and learning patterns using Python and SQL.
- Provided technical support and documentation for internal machine learning tools, enhancing team productivity.

PROJECTS

AI Resume Screening System |

March 2025

- Developed a resume screening web application using Python and FastAPI.
- Implemented keyword matching and ATS score calculation for resumes.
- Built REST APIs and integrated MongoDB for storing candidate data.

Task Management Web Application |

September 2024 – November 2024

- Built a full-stack task management application using React.js, Node.js, Express.js, and MongoDB.
- Implemented CRUD operations, task status tracking, and user authentication features.
- Developed REST APIs and integrated MongoDB for efficient task data management.

Expense Tracker Application |

January 2025

- Built a responsive expense tracking application using React.js and Node.js technologies.
- Implemented income and expense management with category-wise tracking and reports.
- Developed backend APIs and integrated MongoDB database for secure data storage.

Bookmarks Manager (MERN Stack) |

February 2025 – March 2025

- Developed a full-stack bookmark management application using MongoDB, Express.js, React.js, Node.js.
- Implemented REST APIs, CRUD operations, and user authentication for managing bookmarks.
- Developed a responsive React UI with MongoDB database integration and Git version control.

CERTIFICATES

Cloud Computing Intern | edX

Duration: 6 Months

- Gained knowledge of cloud computing concepts, service models (IaaS, PaaS, SaaS), and deployment models.
- Worked with AWS cloud services for basic application deployment and resource management.
- Learned cloud scaling, storage services, and virtual machine management concepts.

Python Full Stack Development | Intern | Data Valley

Duration: 6 Months

- Gained practical experience in Python programming for data handling, automation, and backend development.
- Worked on real-world projects involving scripting, data processing, and integration with APIs and databases.

Full Stack Web Development | Intern | Slash Mark

Duration: 6 Months

- Built full-stack web applications using Node.js, Express, MongoDB, and React.
- Worked on both front-end and back-end, including database integration, user authentication, and API development.
